

Industrial Adhesives

CATALOGUE

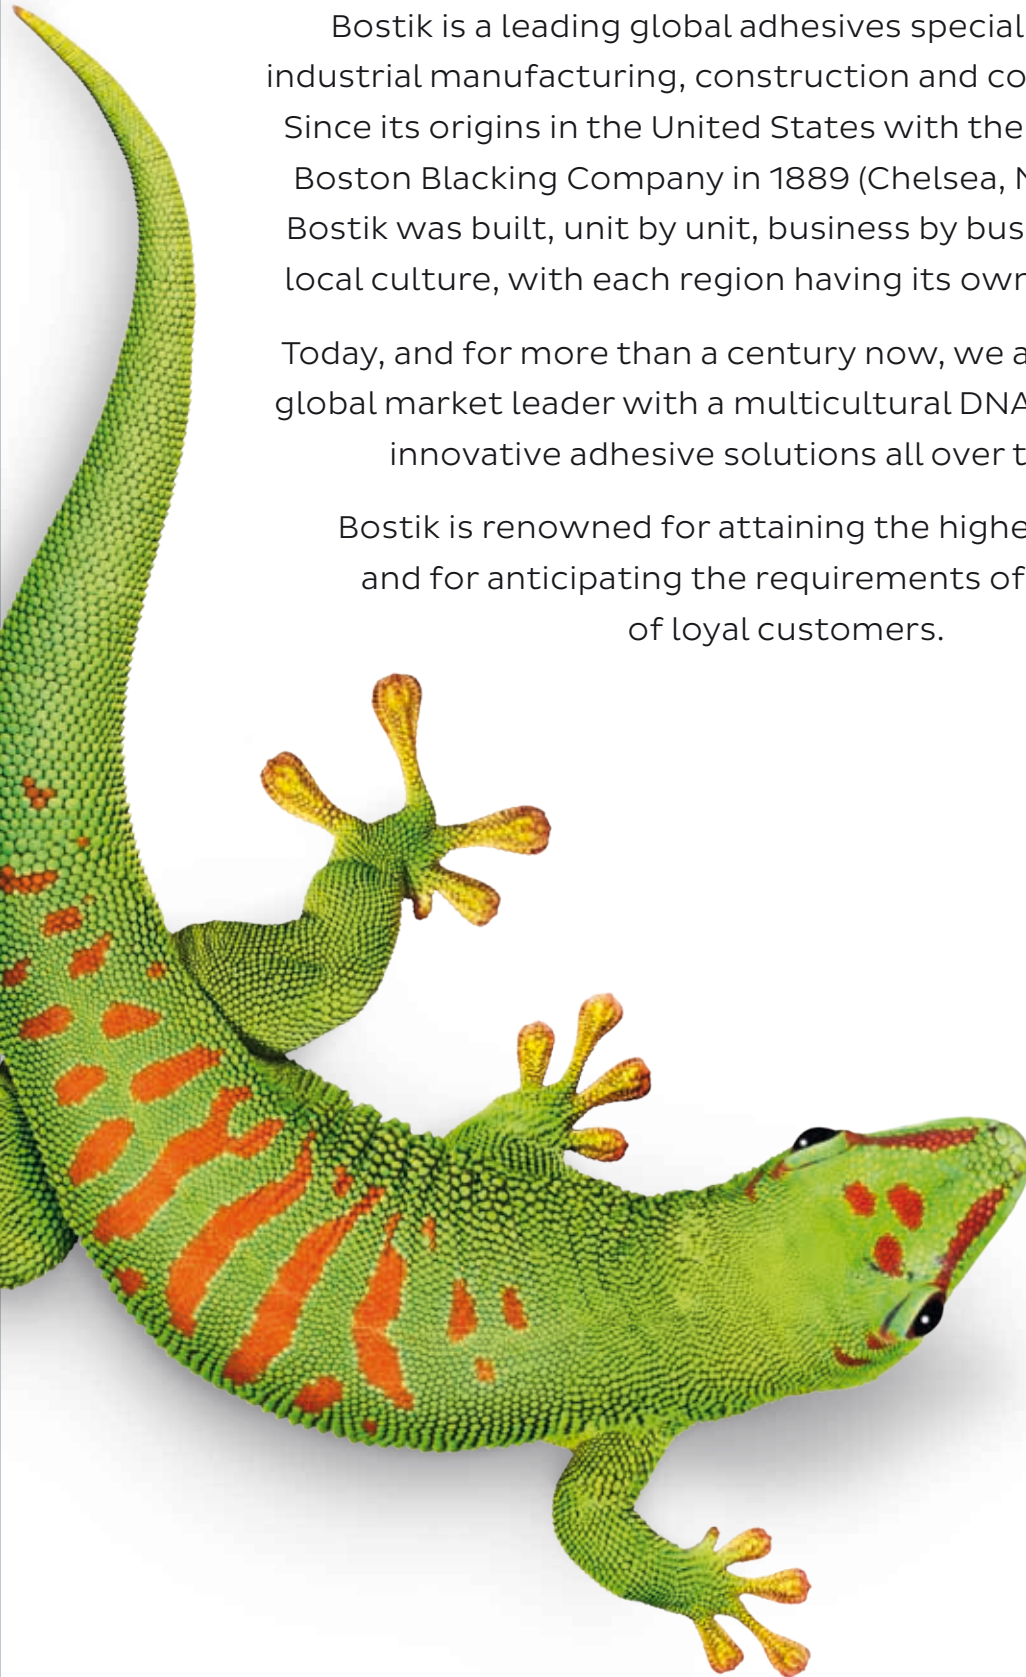

Welcome to our smart world!

Bostik is a leading global adhesives specialist, supplying industrial manufacturing, construction and consumer markets. Since its origins in the United States with the founding of the Boston Blacking Company in 1889 (Chelsea, Massachusetts), Bostik was built, unit by unit, business by business, on strong local culture, with each region having its own unique history.

Today, and for more than a century now, we are proud to be a global market leader with a multicultural DNA which develops innovative adhesive solutions all over the world.

Bostik is renowned for attaining the highest standards and for anticipating the requirements of its millions of loyal customers.

SOLVENT BASED ADHESIVES

1181 Brushable Contact Brushable solvent-based neoprene contact adhesive

Solvent based Neoprene adhesive for excellent durability that will not stain light coloured cotton-backed PVC fabrics. Quick drying with long tack life for ease of use. Softer bond line for flexible substrates with very good heat and water resistance. Intermittent oil and petrol exposure. For use with fabrics and textiles where high durability, heat and water resistance is required. Suitable for bonding of carpet and lining fabrics, leather, furniture foam, motor and marine trim work, general assembly of wood, laminates, rubbers, cementitious materials, glass and common metals. Also suitable for light duty bonding of plasticised PVC. Not for use on polyethylene, polypropylene, Teflon, copper/brass and polystyrene foam. For thinning use Solvent No. 2 and for cleaning use Solvent No. 2 or turpentine.

CODE	COLOUR	SIZE	CARTON

1181S Sprayable Contact Sprayable solvent-based neoprene contact adhesive

A neoprene sprayable adhesive for excellent durability that will not stain light coloured cotton-backed PVC fabrics. Quick drying with long tack life for ease of use. Softer bond line for flexible substrates with very good heat and water resistance. Intermittent oil and petrol exposure. For use with fabrics and textiles where high durability, heat and water resistance is required. Suitable for bonding of carpet and lining fabrics, leather, furniture foam, motor and marine trim work, general assembly of wood, laminates, rubbers, cementitious materials, glass and common metals. Also suitable for light duty bonding of plasticised PVC. Not for use on polyethylene, polypropylene, Teflon, copper/brass and polystyrene foam. For thinning, use Solvent No. 2 and for cleaning, Solvent No.2 or turpentine.

CODE	COLOUR	SIZE	CARTON
30804118	Natural	20L	1
30804117	Red	20L	1

1222 Adhesive General purpose brushable neoprene contact adhesive

Premium Neoprene based formulation for use as a general purpose brushable contact adhesive. Strong initial bond and high bond strength with excellent durability. Good heat and water resistance. Intermittent oil and petrol exposure. Excellent shoe sole attaching cement. Recommended for use on leather, rubber and EVA. Suitable for use on a wide range of substrates including giving excellent adhesion to common metals. Bonding of carpet, vinyl sheet and skirting and stair nosing. Not suitable for polyethylene, polypropylene, Teflon, plasticized PVC except for low stress bonds, copper/brass and polystyrene foam. For thinning, use Solvent No. 2 and for cleaning, use Solvent No. 2 or turpentine.

30804141	Natural	20L	1

1456 Laminating Sprayable solvent-based neoprene laminating adhesive

1456 Laminating provides adhesive for excellent durability and is quick drying. Has strong initial grab and very good heat and water resistance. Heat reactivation and high immediate heat resistance. Intermittent oil and petrol exposure. Suitable for benchtop laminating where high heat and water resistance are required, post-forming rolled edge benchtops, motor home and marine fit-outs, heavy duty bonding of fabrics and materials. Wood, laminates, rubbers, cementitious materials, fibreglass and common metals and light duty bonding of plasticised PVC. Not suitable for polyethylene, polypropylene, Teflon, plasticised PVC except for low stress bonds, copper/brass and polystyrene foam. For thinning use Solvent No. 2 and for cleaning use Solvent No. 2 or turpentine.

30804214	Red	210L (MTO)*	1

2405 (Part A) Adhesive Two-part neoprene blend contact adhesive with good resistance to acids and alkali

Neoprene blend contact adhesive for adhering rubber to substrates and materials. Good chemical resistance to acids and alkali. Gives greater heat resistance and stronger bond with Desmodur RFE. Resistant to oil, petrol and kerosene. Not resistant to esters, ketones, aromatic and chlorinated hydrocarbons. Good water resistance and flexible. High bond strength with good heat and humidity resistance. For thinning use Solvent No. 2 and for cleaning use Solvent No. 2 or turpentine. Suitable for use on rubberised (including Hypalon) canvas, natural and synthetic rubber, rubber to wood, metal (with Primer 17), some rigid PVC's.

Note: The adhesive will deteriorate if subjected to high temperatures and/or humidity on a continuous basis. Not suitable for: polyethylene, polypropylene, Teflon, plasticised PVC except for low stress bonds, copper/brass and polystyrene foam.

Triple 5 BSR Neoprene-based laminating adhesive

High performance neoprene-based laminating adhesive. It can be applied by brush, spray or roller. Versatile for bonding most common substrates. Can be heat reactivated. Good heat and water resistance. Intermittent oil and petrol exposure. For thinning use Solvent No. 2 and for cleaning use Solvent No. 2 or turpentine. Suitable for most laminating requirements. Bonding decorative laminates such as Formica, Laminex etc. to particleboard, benchtop laminating, general bonding for plywood, galvanized iron, wood, veneer, plasterboard. Not suitable for polyethylene, polypropylene, Teflon, plasticised PVC except for low stress bonds, copper/brass and polystyrene foam.

SOLVENT BASED ADHESIVES continued

HP Styrene Adhesive Blue Synthetic rubber blend high performance sprayable contact adhesive for polystyrene

Ideal for bonding lightweight or solvent-sensitive materials. High performance, sprayable, quick initial tack, excellent green strength and good flexibility. For thinning use Solvent No. 1 and for cleaning use Solvent No.1. Suitable for bonding polystyrene foam and other lightweight materials to steel, aluminium and galvanized iron, concrete and masonry, wood and wood products, fibre cement sheet, fibreglass. Bonding polystyrene foam for the construction of prefabricated buildings, sandwich panels, coolrooms, caravans and mobile homes. Not suitable for polyethylene, polypropylene, teflon, plasticised PVC.

CODE	COLOUR	SIZE	CARTON
30804340	Green-Blue	20L	1
30804341	Green-Blue	210L (MTO)*	1

Multigrass Art Grass One-way synthetic turf adhesive

Adhesive for bonding synthetic grass (Astrograss) onto concrete, timber or chip mat. Solvent-based, trowel applied, it has an exceptionally strong initial grab and good gap filling to ensure the best possible bond to all exterior surfaces. Excellent water-resistant bond which is important for outdoor applications. A one-way adhesive with high bond strength and fast tack, it has early water resistance and does not affect turf backing.

CODE	COLOUR	SIZE	CARTON
30804174	Green	20L	1

Neogrip 888 Premium neoprene-based general purpose brushable contact adhesive

Ideal for use as a general purpose, brushable contact adhesive. High viscosity for low absorption on porous substrates. Strong initial bond and high bond strength with excellent durability. Good heat and water resistance. Intermittent oil and petrol exposure. For improved resistance to solvents or oils and heat add Desmodur RFE. For thinning, use Solvent No. 2 and for cleaning, use Solvent No.2 or turpentine. Suitable for a wide range of substrates. Especially suitable for the footwear industry as it has excellent adhesion and is recommended for use on leather, rubber and EVA. Not suitable for polyethylene, polypropylene, Teflon, plasticised PVC except for low stress bonds, copper/brass and polystyrene foam.

CODE	COLOUR	SIZE	CARTON
30804331	Natural	1L	4
30804330	Natural	4L	2

791 Foam Adhesive Yellow Sprayable neoprene contact adhesive for polyurethane foam

Neoprene solvent-based sprayable contact adhesive for polyurethane foam with excellent durability. Good spray pattern with wide fan width for more coverage. Fast grab and soft bond line. 100% foam failure on bonds. No acid effect on lightweight fabrics. Fast drying with long open time. Very good heat and water resistance. Intermittent oil and petrol exposure. For thinning use Solvent No. 2 and for cleaning use Solvent No.2 or turpentine. Suitable for use on polyurethane foam and fabric bonding. Not suitable for polyethylene, polypropylene, Teflon, plasticised PVC except for low stress bonds, copper/brass and polystyrene foam.

CODE	COLOUR	SIZE	CARTON
30804318	Yellow	20L	1

*MTO = Made to order, 6-8 week lead time

Ultragrip 777 Polyurethane-based clear tough contact adhesive

Room temperature tack, colourless non-yellowing bond line, high heat resistance, excellent storage stability, superior bond to polyurethane and PVC with plasticiser resistance. Broad range of possible substrates. Modifiable with Desmodur RFE for greater heat resistance. For thinning, use Solvent No. 4 and for cleaning, use Solvent No. 4. Suitable to use with common shoe industry materials, laminating operations, soft furnishings, automotive and PVC bondings. Two-part adhesive system required for PVC where high moisture resistance is required. Not suitable for polyethylene, polypropylene, Teflon and polystyrene foam.

30804230	Clear	20L	1
30804304	Clear	210L (MTO)*	1

Unigrip 999 HR Heat-resistant high strength PVC adhesive

Polyurethane heat resistant high strength PVC adhesive with excellent creep resistance. Very good plasticizer resistance, low staining, excellent UV resistance and good brushability. Heat-reactivated and Desmodur RFE modifiable. Use as 1 part or 2 part, depending on performance requirements. For thinning use Solvent No. 4 and for cleaning use Solvent No. 4. Suitable for a wide range of substrates. Excellent application for the footwear industry with excellent adhesion and is recommended for use on leather, rubber and EVA. Not suitable for polyethylene, polypropylene, Teflon and polystyrene foam.

EPDM 1 Solgrip Synthetic rubber blend EPDM contact adhesive

Synthetic rubber blend contact adhesive for bonding EPDM. Specifically formulated with good bond strength and suitable for exterior use. For thinning, use Solvent No. 2 and for cleaning, use Solvent No. 2 or No. 3. Recommended for use in bonding EPDM rubber to itself and other common building substrates. Not suitable for polyethylene, polypropylene, Teflon, plasticised PVC, copper/brass and polystyrene foam. Service temperature: Continuous -20 to +60°C

WATER BASED ADHESIVES

166 Be Be Tex Natural rubber adhesive

Bostik 166 Be Be Tex is a water-based natural rubber adhesive with high solids content and very fast bonding properties. It has high peel strength. Recommended for use on leather, cardboard, wood, fabric, felt, some synthetics, shoe, handbag, other leather and decorative industries.

CODE	COLOUR	SIZE	CARTON
30804163	Milky white	20L	1

WATER BASED ADHESIVES continued

33 LV Adhesive Water-based, high resistance to sunlight & UV radiation laminating adhesive

A non-staining, odour-free, non-hazardous laminating adhesive that develops rapid bond strength. Brush, roll or spray application. Good for most plastic films and heat or solvent reactivated. Suitable for laminating rigid or plasticised PVC to chipboard. Adhering polyurethane foam to fabrics and various plastics, and solvent-sensitive polystyrene foam to porous surfaces. Can also be used as an artwork and label adhesive. Not suitable for polyethylene, polypropylene, Teflon.

CODE	COLOUR	SIZE	CARTON
30804021	Milky white	20L	1

Linkbond III Self crosslinking D3 PVA

Bostik Linkbond III is a one-part self crosslinking PVA glue with superior heat resistance and excellent water resistance. Extremely fast grab and bond strength development. Low viscosity suits all application methods. Non-flammable and non-toxic. Responds well to RF heating and meets European exposure group BS EN 204 (D3). High solids content. Recommended for use on wood, paper, leather, cardboard, HPL flat lamination and post forming

PU ADHESIVES

Alpha Grip 1 hour cure foaming PU construction adhesive

Solvent-free, thixotropic, quick setting, moisture-cured D4 polyurethane adhesive. Alpha Grip is stronger than wood after one hour – when fully cured has an extremely strong bond with excellent resistance to water, weathering, ageing and marine conditions. Foams slightly to fill gaps and cracks. Tested and approved for use with Laminex Strandfloor. Certified to EN204 D4. Ideal for flooring and general construction and for bonding porous to non-porous substrates.

CODE	COLOUR	SIZE	CARTON
30609963	Bright Cream	310ml Cartridge	20

AEROSOLS

AEROSOL CONTACT ADHESIVES

Supertak High Performance High performance aerosol adhesive

A fast tack, fast grab, low soak-in spray adhesive especially formulated to bond polyethylene to itself, concrete block, wood and many hard-to-bond surfaces. Synthetic rubber blend with good heat resistance. Go-to for all difficult substrates, temporary or permanent bonds. For cleaning, use Solvent No. 2 or No. 3. Recommended for use to bond paper, cardboard, fabric, urethane foam, foil, metal, wood and most plastics to itself and a variety of other substrates. Attaching carpet, door skins, and fabric in van conversions and bonding swimming pool liners. Bonding various plastics to each other and forming permanent bonds between porous and nonporous surfaces. Not suitable for Teflon, plasticised PVC, polystyrene foam.

CODE	COLOUR	SIZE	CARTON
30804494	Natural	23.8oz	12

Supertak HS Sprayable contact adhesive canister

Synthetic rubber blend 17 kg aerosol canister for easy spray application. High solids, good general purpose adhesive with low soak-in on porous substrates. Portable, high strength bonds, short tack time, good temperature resistance and good water resistance. For cleaning use Solvent No.2 or No.3. Recommended for fabric and textiles where high durability, heat and water resistance are required. Bonding of carpet and lining fabrics, leather, furniture foam and highly loaded fabric joints such as lifting straps. Supertak HS will bond most types of polyethylene (polythene) but a test should be carried out to confirm, as some grades contain slip agents which prevent bonding. Not suitable for polypropylene, Teflon, plasticised PVC and polystyrene foam.

AEROSOL LUBRICANTS

Bearing Lubricant Bearing and general purpose lubricant

Significantly reduces bearing load friction and burn-out with regular maintenance using Bostik Bearing Lubricant. Reducing operating friction by 25% and lubricates under loads up to 50% greater than oil. Effective lubricant up to 550°C, it will extend bearing life by up to 3 times and can unfreeze frozen bearings. Dries quickly and will NOT gum-up, even after several applications. Silicone free, an environmentally safe aerosol with no CFCs or ODCs. Ideal for router work on all wood and solid surfaces. Also suitable to use to lubricate locks, roller, ball, wheel bearings, hinges, castors and drawer slides.

CODE	COLOUR	SIZE	CARTON
30606627	Clear	5.5oz	12

BladeCote Blade and bit lubricant

Significantly reduces cutting friction and resin or pitch buildup. Apply regularly for increased productivity and extend overall blade life by up to 3 times and reduce heat by 30 percent. BladeCote dries in seconds and will not gum-up, even after several applications. A lubricant for industrial, commercial and residential uses. Suitable to use on all blades, router and drill bits, knives, chisels, screws and nails. Use to lubricate chains, gears and pulleys.

CODE	COLOUR	SIZE	CARTON
30804586	Clear	10.75oz	12

GlideCote Table and tool surface sealant

Regular maintenance of saw tables and receiving tables with GlideCote™ significantly reduces sliding friction on all metal, laminate, and plastic surfaces. Recommended for use for table saw beds, drill presses, lathes, planers, band saws, miters, panel saws, and all hand tools. Eliminates "hang-ups" on sliding surfaces. Will not build-up even after several applications and will not stain or affect finishing of wood. Contains no petroleum oils or silicone. Protects all tools and equipment from rust. Up to 30% slicker than paste wax. Easier and quicker to apply than paste wax. Lasts three times longer than paste wax.

CODE	COLOUR	SIZE	CARTON
30603712	Clear	10.75oz	12

CROSSLINKING AGENTS

Boscodur No. 10 General purpose crosslinker for contact adhesives

Bostik Boscodur No. 10 is a general purpose crosslinker with improved adhesion values, heat resistance and low usage levels. Recommended for use as crosslinking agent for polyurethane, nitrile and polychloroprene adhesives.

CODE	COLOUR	SIZE	CARTON
30804143	Dark Brown	500mL	10 (also sold separately)

Desmodur RFE Polyisocyanate crosslinking agent

Desmodur RFE polyisocyanate is a solution of tris (p-isocyanatophenyl) thiophosphate in ethyl acetate. Desmodur RFE polyisocyanate is a highly effective crosslinker for adhesives based on polyurethane, natural rubber or synthetic rubber. Desmodur RFE polyisocyanate is also useful for improving adhesion to rubber-based materials.

CODE	COLOUR	SIZE	CARTON
30604139	Brown	50mL	105 (also sold separately)
30804298	Brown	750mL	20 (also sold separately)

MS RANGE

MS Safe Seal Solvent-free, high performance MS construction sealant

BRANZ Appraisal 705, this is a high performance, heavy duty, MS-based construction sealant that is fully paintable. Solvent-free, highly elasticity and flexible, and sticks to most surfaces. Ideal for sealing construction joints, building and expansion joints. Primer: Prep M for non-porous and metal substrates, Prep P for porous substrates.

CODE	COLOUR	SIZE	CARTON
30605491	White	300ml Cartridge	12
30605492	Grey	300ml Cartridge	12
30605493	Black	300ml Cartridge	12

30804013	Grey	600ml Sausage	12
30804011	Black	600ml Sausage	12

MS Safe Fix Solvent-free, high performance MS construction adhesive

BRANZ Appraisal 662, multi-purpose, heavy duty, MS-based adhesive for construction and building. Elastically seals most building materials and surfaces. Green Star compliant, it is ideal for green builds – low VOC, odour-free and solvent, silicone and isocyanate-free. Exceptionally high initial grab, adheres to common building substrates and solvent sensitive substrates such as mirrors and polystyrene.

CODE	COLOUR	SIZE	CARTON
30605494	White	300ml Cartridge	12

SPECIALTY SEALANTS

Duct Sealer Fast drying non-slump sealer

A non slump, fast drying adhesive/sealer. Once fully dried, Duct Sealer remains fully flexible, performing over a wide temperature range on both internal and external surfaces. It is paintable and bonds well to most commonly found construction surfaces such as galvanised steel and other metals, wood, and concrete. Recommended for use in sealing lap joints in heating and air conditioning ducting, sealing roofing joints. Automotive applications such as internal seam repairs on cars, buses, caravan and trailer bodies. Bonds well to metals including galvanized iron and ducting foil. Also bonds to wood and concrete.

CODE	COLOUR	SIZE	CARTON
30804300	Grey	375ml Cartridge	20

Idenden 40-317 High velocity acrylic duct sealant

Bostik 40-317 high velocity acrylic duct sealant forms a tough, yet flexible seal, which prevents loss of internal pressure without the necessity of additional tape. It is both waterproof and flame retardant and has excellent adhesion to metal surfaces. Designed for use on both low and high velocity heating and air conditioning ducts.

CODE	COLOUR	SIZE	CARTON
30601510	Grey	280ml Cartridge	12

5612 White Butyl Sealer Non skinning butyl mastic sealant

Specifically formulated as a bedding or gasket style sealant. It remains in a soft plastic state providing a dustproof, weatherproof and flexible seal in a variety of construction and manufacturing materials. Recommended for use in coolroom wall component sealing. Sea container metal to metal lap joints. Air conditioning flange joint sealing. Glazing seal. Bedding or internal sealing of construction fitting such as aluminium windows or flashing.

CODE	COLOUR	SIZE	CARTON
30804526	White	450g Cartridge	10

SPECIALTY SEALANTS continued

**5615 Easy Clean** Self-skinning mastic sealer

Bostik 5615 is a synthetic rubber mastic compound, which has been specifically formulated to remain permanently flexible in use. Excellent UV light resistance in glazing applications. Tenacious adhesion to nearly all surfaces with good service temperature range (-35°C to 65°C). Minimal swell effect on rubber and self skinning. It is predominantly used in the automotive aftermarket area for secondary sealing of windscreens where a durable, skinning product is required. Recommended for use in sealing of rubber gasket type windscreens and spot weld sealing.

CODE	COLOUR	SIZE	CARTON
30804610	Black	520g Cartridge	10

**RTV 922** High performance industrial silicone sealant

Acetic cure, 100% silicone rubber. Won't slump, sag or run off surfaces. Excellent working temperature range: -50 to 235°C. Good resistance to weathering, moisture, motor oils and some chemicals. Adheres to a variety of substrates. Meets the requirements of many industrial, mining and OEM applications. Ideal for sealing windows in oven doors (subject to temperature range of oven), sealing access doors on gas appliances, sealing gaskets in heating and refrigeration units, bonding and sealing appliance parts, industrial, mining and automotive maintenance and more.

CODE	COLOUR	SIZE	CARTON
30804656	Black	300g Cartridge	15
30804651	White	300g Cartridge	15
30804659	Clear	300g Cartridge	15

**RTV 926** High performance industrial silicone sealant

Neutral cure, 100% silicone rubber. Won't slump, sag or run off surfaces. Excellent electrical insulation properties. Excellent working temperature range: -50 to 205°C. Good resistance to weathering, moisture, motor oils and some chemicals. Good adhesion to metal, aluminium, wood, some rubber and plastics. Non-corrosive sealant (for copper use RTV 928). Meets the requirements of many industrial, mining and OEM applications. Makes formed-in-place gaskets for ducting, whitegoods, electrical sealing, sealing of manhole covers, water tank and industrial piping. Seals gaskets in heating and refrigeration units, bonds and seals appliance parts, ideal for industrial, mining, automotive, marine and general maintenance applications and more.

**RTV 936** High temperature industrial silicone sealant

High-temperature, acetic cure 100% silicone rubber. Won't slump, sag or run off surfaces. Excellent electrical insulation properties. Excellent working temperature range: -60 to 275°C. Good resistance to weathering, moisture, motor oils and some chemicals. Adheres to a variety of substrates. Meets the requirements of many industrial, mining and OEM applications. Ideal for industrial applications where high heat resistance is required, including industrial ovens and boilers, domestic cookers and ovens, flues on gas appliances, household electrical and industrial heating equipment, smoke stacks, moving oven belts, and for sealing and encapsulating heating elements in appliances.

FIRE RATED SEALANTS

Fireban One Fire and acoustic rated polyurethane construction sealant

Fire and acoustic rated, intumescent, low modulus, Class A Polyurethane. For fire rating of jointings of concrete, precast panels, block and brick work, drywall systems, electrical cables and pipe penetrations, in conjunction with other systems such as fire collars, pillows, board systems and fire rated mortars. Fire rated for up to 4 hours, it is suitable for interior and exterior surfaces, and retains its original properties even after years of weather and UV exposure. Approved for use in many GIB® acoustic systems (refer to document Lt001 2012071A MJC Acoustic Sealant Opinions).

CODE	COLOUR	SIZE	CARTON
30606866	Grey	600ml Sausage	20

Firecaulk Intumescent fire rated and acoustic sealant

Fire and acoustic rated intumescent acrylic sealant. Fire Rating for jointing of concrete, precast panels, block and brick work, drywall systems, electrical cables and pipe penetrations. In conjunction with other systems such as fire collars, pillows, board systems and fire-rated mortars. Provides a fire barrier for up to 4 hours, helping to prevent the spread of fire, smoke through walls and floors and prevents passage of hot gases. Fire resistant to AS1530.4 and AS4072.1, and fire rated for gaps up to 40mm. Approved for use in many GIB® acoustic systems.

SILICONE SEALANTS

Roof & Gutter Silicone Weatherproof, premium 100% silicone sealant

Premium, waterproof, weatherproof, permanently flexible translucent sealant with excellent adhesion to common construction materials and metals. Neutral cure and is ideal for green builds. Excellent adhesion, it stays permanently flexible – joint movement capability of $\pm 25\%$. It will not corrode bare metal and is ideal for metal roofing systems, plumbing applications, air conditioning ducting and sheet metal fabrications, flashings and downpipes, skylights and extraction units, pipe or sprinkler system penetrations.

V60 Silicone Sealant Architectural grade waterproofing silicone sealant

Premium grade neutral cure glazing weatherproofing silicone sealant. Superior adhesion to aluminium and glass has made V60 Architectural Grade Silicone a market leader in the glass market for 15 years. It has U.V. and weather stability, maintaining reliable flexible and durable elastomeric sealant by absorbing atmospheric moisture as it cures. It is suitable for all types of glazing and waterproofing. Bostik V60 Silicone Glazing Sealant meets or exceeds the requirements of the following specification for a one-part sealant. AS-1288-2006 ASTM C1184, Type S, Use G and O. C920: Type S Grade NS, Class 35, Use NT, A, G, O. GB – 16776 Meets Low VOC Rating-47g/L (SCAQMD) AS/NZS4020-2005 – Drink water approved AWQC (Translucent only).

PU SEALANTS

Seal N' Flex 1 Polyurethane construction joint sealant

Low modulus, polyurethane sealant. When cured, forms a tough, flexible seal and bond capable of cyclic expansion and compression movement of up to 100% (+ 50%) of the original installed joint width. Paintable, acoustic rated and durable to harsh weather conditions. Specified adhesive/sealant for James Hardie Systems. Suitable for use for heavy commercial applications and substrates including metals, glass, concrete, brick, wood, plasterboard, marble, granite, sandstone, plasterboard face and paper-lined recessed edges and GRC. Conforms to ISO11600-F-25-LM. MPI approved for use in farm dairies.

ADHESIVES

Simson MSR Construction Adhesive SSKF Silyl Modified Polymer

Bostik Simson MSR Construction Adhesive SSKF is a 1-component, permanently elastic, fast curing construction adhesive, based on Silyl Modified Polymer (SMP). It is the longer open time version of the MSR Construction Adhesive. This product has been developed for bonding and sealing applications in the yacht and boatbuilding industry. MSR Construction Adhesive SSKF has been tested and certified to the International Maritime Organisation Fire Test Procedures for Surface Flammability, resolution A.653(16) and has been approved for use in wall, ceiling and floor applications. Recommended for use in bondings and sealings in nautical applications, where adhesion and deformability have to comply with extreme requirements. Typical applications include bonding push borders, bonding and sealing deck fittings, bonding deck coverings, bonding sheets, bonding and sealing deck/hull connections, deck hatches and portholes. As bedding compound whenever a higher initial strength is required.

Simson ISR 70-08 AP Silyl Modified Polymer

Simson ISR 70-08 AP is an excellent quality elastic adhesive based on Silyl Modified Polymers (SMP). It is suitable for bonding windows (e.g. cars, buses and trains) or other industrial applications which require high green strength (initial tack) to avoid or reduce clamping times. It can also be used for sealing applications. Simson ISR 70-08 AP is tested according to DIN6701, has excellent resistance to UV, weather and temperature and is free of solvents, isocyanates and silicone. It exhibits excellent adhesion performance on a wide variety of substrates (minimal or no pre-treatment necessary) and can be over-painted with common industrial paints.

PRIMERS

Simson Cleaner E Cleaner and degreaser

Bostik Simson Cleaner E is a preparation agent, ideally suitable for cleaning and degreasing substrates for bonding or sealing with specific Simson products. Recommended for use as cleaning and degreasing joints in teakwood decks (prior to the application of Simson Primer P). Removing uncured sealant and adhesive, based on Silyl Modified Polymer (SMP), silicones, polysulphide and polyurethane from substrates and tools. Degreasing and cleaning glass substrates.

CODE	COLOUR	SIZE	CARTON
30804188	Clear	500ml	10 (also sold separately)

Simson Prep M

Bostik Simson Prep M is a one-step pretreatment for the improvement of the adhesion on non-porous substrates of several specific Simson products, based on Silyl Modified Polymer (SMP). Recommended for use in pre-treatment of plain aluminium, steel, copper and brass surfaces. Pre-treatment of powder coated metals, pretreatment of lacquered metals (first make a test on the substrate to check possible effects), pre-treatment of polyester (GRP), pretreatment of ABS and pretreatment of PVC.

CODE	COLOUR	SIZE	CARTON
30608604	Clear	250ml	24

PRIMERS continued

**Simson Primer MSP**

Bostik Simson Primer MSP is a liquid primer for adhesion improvement of sealants and adhesives on porous surfaces. Recommended for use in pre-treatment of mineral surfaces, such as brick, concrete and cellular concrete. For use with SMP (MS) products.

CODE	COLOUR	SIZE	CARTON
30022080	Clear	500ml	1

**Simson Prep G**

Bostik Simson Prep G has been developed as a black pretreatment for use on glass, not having a ceramic coating, in order to provide a UV-protecting coat, before applying special adhesives for bonding glass (also PMMA and PC) in the automotive, bus, ship and railway industries. Recommended for pretreatment of glass substrates without ceramic coating. Repair of damaged paint layers on metallic supports.

CODE	COLOUR	SIZE	CARTON
30804483	Black	250ml	1

**Simson Prep G Plus**

Bostik Simson Prep G Plus has been developed as a black pretreatment for use with Bostik products on glass that is not protected from UV by a ceramic coating. Also PMMA and PC. Used in the automotive, bus, ship and railway industries. Repair of damaged paint layers on metallic supports.

CODE	COLOUR	SIZE	CARTON
30602131	Black	250ml	1

**Simson Prep P**

Bostik Simson Prep P is a liquid pre-treatment for improving the adhesion of several Simson products on porous substrates. Recommended for use in pretreatment of mineral substrates, such as brickwork, concrete and lightweight concrete. Pre-treatment of wooden substrates (such as seams in teakwood ship decks). For use with SMP (MS) products. For use with SMP (MS) products.
